

Proceedings of the Society for Experimental Biology and Medicine Volume 4

Filesize: 4.51 MB

Reviews

This ebook will never be straightforward to get started on looking at but really fun to read. It is amongst the most incredible publication i have got read through. I realized this pdf from my i and dad encouraged this publication to learn.

(Mrs. Anya Kautzer)

PROCEEDINGS OF THE SOCIETY FOR EXPERIMENTAL BIOLOGY AND MEDICINE VOLUME 4

To save **Proceedings of the Society for Experimental Biology and Medicine Volume 4** PDF, you should click the hyperlink below and download the file or gain access to other information that are highly relevant to PROCEEDINGS OF THE SOCIETY FOR EXPERIMENTAL BIOLOGY AND MEDICINE VOLUME 4 book.

General Books LLC. Paperback. Book Condition: New. This item is printed on demand. Paperback. 62 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1907. Excerpt: . . . strated the untrustworthiness of any such differentiation of the anti-bodies as those contained in the euglobulin and those of the pseudoglobulin. No evidence has been adduced from our experiments to show that the agglutinins developed in the rabbit, goat and horse can be classed as belonging to either globulin, or that these anti-bodies can be separated from one another by ammonium sulphate fractioning of polyagglutinative sera. 16 (159) Farther observations of the effects of ions on the activity of enzymes. By WILLIAM N. BERG and WILLIAM J. GIES. From the Laboratory of Biological Chemistry of Columbia University, at the College of Physicians and Surgeons. Previous communications from this laboratory¹ have made it evident that peptolysis of fibrin is unequal in rate and extent in acid solutions of equipercantage, equinormal (isohydric), equimolecular, or equidissociated (isohydronic) concentration. The same may be said of tryptolysis of the same protein in a series of bases of analogous concentrations. We have found that the sequence of zymolysis, both in rate and extent in a given group of acid or basic solutions, varies considerably with the nature of the protein. This fact makes it impossible accurately to formulate statements regarding various phases of peptolysis or tryptolysis without specifying the particular protein involved in the process; it also renders doubtful various general conclusions of common acceptance pertaining to digestion that have been derived, in one research or another, from the use of a single protein. A study of the peptolysis of...
